

I SUPPORT RM-10811. Of all the numerous Morse proposals that have been submitted to date, this proposal is the most complete with respect to retaining a Morse requirement, improving technical competencies, and protecting digital mode sub-bands.

One of the main reasons I became interested in Amateur radio was for the opportunity of learning and actually using Morse Code. I operate 99% of the time using CW and I am currently teaching my children this mode as well. I hope that they will be able to have the same opportunity to enjoy the Amateur radio bands as I have had using Morse Code.
